PROFESSIONAL SUMMARY

Software Developer and Master of Computer Applications (MCA) candidate, Dreamvestor 2.0 Grand Finale finalist, with IBM, Google and IIT Madras certifications. Skilled in C#, ASP.NET Core, React, Django, Python and PostgreSQL, with hands-on experience in backend architecture, secure REST APIs and full-stack application development. Builds production-ready, maintainable software on Clean Architecture principles, from enterprise financial platforms to automated data-processing systems.

TECHNICAL SKILLS

Languages: C#, Python, JavaScript, Dart

Backend: ASP.NET Core, Django, Express.js (Node.js), REST API Development

Frontend: React.js, Flutter, HTML/CSS

Databases: PostgreSQL, MongoDB

Cloud & DevOps: AWS, Docker, Git/GitHub

Practices: Clean Architecture, Problem Solving

EXPERIENCE & PROJECTS

AegisTrader – Enterprise Financial Simulation Platform *React.js, ASP.NET Core, PostgreSQL*

- Engineered an enterprise-grade financial simulation platform using ASP.NET Core for backend operations and React.js for a responsive, interactive user interface.
- Designed a scalable PostgreSQL database architecture to efficiently store and query complex financial data.
- Implemented Clean Architecture principles to keep the codebase maintainable and data handling strictly controlled.

m1-ob-scalper – Automated Market Data System *Python, MetaTrader 5*

- Developed an automated, high-frequency data parsing system in Python that interfaces directly with MetaTrader 5 real-time data feeds.
- Built logic-driven algorithms to process market data with low latency, automating decision workflows.

Mental Health App – Cross-Platform Mobile Application *Flutter (Dart), Express.js*

- Built a cross-platform mental health mobile application with Flutter for a consistent experience across devices.
- Constructed a secure Express.js (Node.js) backend API to handle user data and application logic efficiently.

Django Web Development Trainee – Faith InfoTech, Technopark, Thiruvananthapuram *1-week industrial training*

- Developed a clinic management system in Django within a one-week programme, delivering a working application from requirements to completion.
- Applied Django's MVT architecture, models and database integration to manage clinic data and workflows.

EDUCATION

Master of Computer Applications (MCA) – MACFAST, Tiruvalla (Mahatma Gandhi University) 2025 – 2027

Bachelor of Computer Applications (BCA) – SAS, Konni (Mahatma Gandhi University) 2022 – 2025

CERTIFICATIONS & ACHIEVEMENTS

- Dreamvestor 2.0 Grand Finale Finalist – ASAP Kerala and KSIDC
- Security Principles in Cloud Computing – Google, Coursera
- Python for Data Science – IIT Madras, NPTEL
- Generative AI: Prompt Engineering – IBM, Coursera
- Exploratory Data Analysis for Machine Learning – IBM, Coursera
- Supervised Machine Learning: Regression – IBM, Coursera
- Full Stack Web Development (MERN Stack)
- UNXT Soft Skill Development Program – SGBS Unnati Foundation
